

Create your space

Before getting started, select and set aside a physical space in your home to use for lessons and activities.

You are looking for a space that agrees with, or is conducive to an atmosphere of peacefulness and order. It does not necessarily need to be a dedicated room, many families use their dining room or a corner of the lounge. However during school hours it should be able to be dedicated to joyful learning and gentle growing.

Practically you will need

- a worktop or table
- a little space dedicated to any books, stationery and a file to neatly keep any work done.
- Look for a space that is quiet and has lots of light.

It really is as simple as that!
